---

## SELF EVALUATION

Motivated engineering student with a strong foundation in computer science, software development, and problem-solving. Proficient in C++ and Python, developing in JavaScript, Java and SQL with experience in algorithms and object-oriented programming. Passionate about designing efficient and scalable software solutions. Seeking a Software Engineering role to apply technical expertise and innovative problem-solving skills.

---

## STRENGTHS AND EXPERTISE

- **Teamwork & Leadership:** Participated in major TAMUG Aquatic Robotics Club projects, contributing to the development of a functional underwater robot. Led most group projects in STEM courses such as Engineering Lab Computation and Technical & Professional Writing.
  - **Time Management:** Balanced coursework, club projects, and article translations by managing time efficiently and prioritizing tasks effectively.
  - **Language & Communication:** Fluent in Mandarin and English, with extensive experience translating sports-related articles and passages from English to Chinese.
  - **Diligence:** Eager to learn new skills from both the role and colleagues, committed to assigned tasks, and open to exploring different work responsibilities.
- 

## RELEVANT EXPERIENCE/COURSE

### Casio (Shanghai)

FALL 2024 - SPRING 2025

- Engaged with prospective customers to introduce products, effectively communicating key features and benefits while collecting valuable feedback to inform product development.
- Partnered with cross-functional team members to interpret consumer insights, contributing to the refinement of marketing strategies and product offerings.
- Filmed and edited promotional and product demonstration videos, enhancing outreach efforts and supporting multimedia marketing campaigns.

### Junrun Shuzhi Technology

SUMMER 2025

- Assisted in developing and testing AI agent modules using Java, focusing on backend logic and system integration.
- Helped design and implement workflow systems to imitate the advertising patterns in order to propagate AI agent products.
- Gained hands-on experience with object-oriented programming, debugging, and version control in a collaborative environment.
